

ETICS 10 mm render closing profile "upside down"
 (ETICS = external thermal insulation composite system)

Note:
 This detail is a general proposition which schematically shows a possible execution. Usability and completeness are to be checked under personal responsibility regarding the particular construction project.

Related works are only shown schematically.

The specifications of corresponding standards, relevant system authorisations and data sheets are to be respected. All specifications and assumptions are to be customised to local conditions.
